CERTIFICATE OF AUTHORSHIP / ORIGINALITY

I certify that the work in this thesis has not previously been submitted for a degree nor has it been submitted as part of requirements for a degree except as fully acknowledged within the text.

I also certify that the thesis has been written by me. Any help I have received in my research work and the preparation of the thesis itself has been acknowledged. In addition, I certify that all information sources and literature used are indicated in the thesis.

Signature of Candidate

A handwritten signature in black ink, consisting of a stylized 'P' and 'D' followed by a horizontal line.

Peter Dalmaris

Acknowledgments

This work would not be possible without the help and encouragement I received from the incredible people I was fortunate to have crossed paths with.

My PhD committee has helped me far beyond what I had reasonably expected. My sincere “thank you” and gratitude goes to you for enduring my constant need for help and advice for almost three years, despite your already overloaded schedules. Thank you (no particular order) to Professor Ken Dovey, Dr Bill Hall, Professor Bob Smith and Professor Eric Tsui for making this work possible.

Michelle, my best friend and future wife, you were responsible for keeping me focused on the job, and sane. You gave me stability and respite, and with your positive attitude made me comfortable despite the continuous hard work. Through the trials of this PhD we developed a strong sense of mutual respect and support that will be the foundation of our future life. Thank you for everything you have done for me.

To my family, as always, you have been fundamental in everything I have done thus far.

My parents, Despina and Theodore, sister Eleftheria, brother John, and grandparents Eleftheria and Panayioti, are the ones that helped me develop the way I did. By succeeding in this work, I am proud to show them that their faith in me is well justified. For this faith, I thank you.

Finally, I wish to thank the examiners of my work for their thoughtful and helpful comments. Although I was not able to address all of them, I did consider every one of them. Be assured that you have been a significant positive influence of my future work.

All I know is that I know nothing.

Wisdom is to know how little we know.

Socrates (470B.C. – 399B.C.)

There are no authoritative sources of knowledge, and no 'source' is particularly reliable.

Everything is welcome as a source of inspiration, including 'intuition'; especially if it suggests new problems to us.

But nothing is secure, and we are all fallible.

Karl Popper (1902 – 1994)

Abstract

This thesis reports on the results of research into the development of a framework for the improvement of knowledge-intensive business processes (KBPI). This framework is composed of three parts: an epistemology, which provides a working definition of the concept of knowledge and a theoretical foundation of the improvement framework; a business process ontology, used to describe a business process; and an improvement methodology, used to guide the improvement process. The framework was tested on three different business processes through the conduct of three case studies. The case study results show that the KBPI can be applied to the process analysis and improvement of a variety of business processes but is especially useful to those processes that are knowledge-intensive.
